The diagram illustrates a grid structure with vertical and horizontal lines. A bracket on the left labeled "BSG" spans three horizontal lines. On the right, four horizontal lines are labeled "BCP(i+2)", "BCP(i+1)", "BCP(i)", and "BCP(i-1)". At the bottom, three vertical lines are labeled "BCM(j-1)", "BCM(j)", and "BCM(j+1)". A bracket at the bottom labeled "BSG" spans the three vertical lines. Points are labeled as follows:  $Q^3_{j,i}$  at the intersection of the top horizontal line and the second vertical line;  $B^0_{i,j}$  at the intersection of the second horizontal line and the second vertical line;  $B^3_{i,j}$  at the intersection of the third horizontal line and the third vertical line;  $Q^0_{j,i}$  at the intersection of the fourth horizontal line and the second vertical line;  $B^1_{i,j}$  at the intersection of the fourth horizontal line and the third vertical line; and  $B^2_{i,j}$  at the intersection of the fifth horizontal line and the third vertical line. Arrows point from the "BSG" labels to the corresponding points in the grid.
